### Description:

Electric Power Systems, Inc is a unique company offering a wide range of experience and education in the area of power system operations, design, consultation and studies. We provide extensive services from planning studies, design and construction, to periodic testing and maintenance. We are currently seeking a skilled Electrical Engineer to join our Alaska team.

### Responsibilities:

This person will be responsible for the performance of system planning studies, arc-flash and coordination, power flow and short-circuit studies. The person will be responsible for developing and managing complex excel spreadsheets and analyzing a variety of data. The person will be responsible for analyzing low voltage, medium voltage distribution systems, designing distribution and transmission systems in unique environments, and project management. The person will be responsible for preparing reports using Microsoft word and developing proposals and project schedules for projects. The person will be responsible for managing their own projects and directing others including tracking project data requests, data submissions, progress submissions to client and comments from clients.

### Benefits:

Electric Power Systems offers a great benefit package including Medical Insurance, Life Insurance, Long Term Disability, 401 (k) Plan, Employee Assistance Program, Paid Vacation and Paid Holidays.

Electric Power Systems, Inc. is an Equal Opportunity Affirmative Action employer that values diversity at all levels. We consider candidates for all positions on the basis of qualifications and without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, marital status, protected veteran status, disability and any other legally protected status. Minorities, women, veterans and individuals with disabilities are encouraged to apply. We are an EEO/AA employer.

Electric Power Systems, Inc. is a smoke free and drug free company.
