Description:

Engineered Solutions Group is a unique company offering a wide range of experience and education in the area of power system operations, engineering, and administration. We provide extensive services from planning studies, design and construction, to periodic testing and maintenance.

We are currently seeking a skilled Transmission Design Engineer with project management experience to join our team. This is a full-time position and requires some travel. Experience utilizing PLS-CADD is required. You must have knowledge of NESC code as well. Alaska professional engineer/registration or the capability of acquiring the registration within 6 months is preferred. You will be responsible for the development of transmission line design (engineering analysis, route selection, structure spotting, and line design calculations), business development, and client interaction. Other responsibilities include technical design, project review, development of transmission standards, drawings, specifications, cost estimating, project scheduling, and project management.

Benefits:

Electric Power Systems offers a great benefit package including Medical Insurance, Life Insurance, Long Term Disability, 401 (k) Plan, Health Club Membership, Employee Assistance Program, Paid Vacation and Paid Holidays.

Electric Power Systems, Inc. is an Equal Opportunity Affirmative Action employer that values diversity at all levels. We consider candidates for all positions on the basis of qualifications and without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, marital status, protected veteran status, disability and any other legally protected status. Minorities, women, veterans and individuals with disabilities are encouraged to apply. We are an EEO/AA employer.

Electric Power Systems, Inc. is a smoke free and drug free company.
